Birgunj, Nepal • +977 9814295445 • avishekk922@gmail.com

Full-Stack Developer | Laravel | React | Angular | MySQL | API Integration

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience building and maintaining Laravel-based web applications and dynamic frontend interfaces. Proficient in Laravel MVC architecture, Eloquent ORM, Blade templating, RESTful API integration, MySQL database management, React, and Angular. Completed a Bachelor's in Information Technology from Tribhuvan University and brings a strong track record of delivering production-ready web solutions across internship and junior developer roles. Quick learner with a passion for clean code, scalable architecture, and modern full-stack development.

PORTFOLIO & GITHUB

Portfolio: [Avishek Kumar Gupta | Portfolio](#)

GitHub: github.com/Avishek922

TECHNICAL SKILLS

Backend: Laravel (Routing, Eloquent ORM, Middleware, Blade, Artisan CLI, MVC), PHP, RESTful API Integration

Frontend: React, Angular, HTML5, CSS3, JavaScript, Bootstrap, Laravel Blade

Database: MySQL (schema design, queries, migrations, Eloquent relationships)

Tools & Workflow: Git, GitHub, VS Code, Thunder, XAMPP, Composer

Concepts: MVC Architecture, Responsive Design, Cross-browser Compatibility, CRUD Operations, Authentication & Authorization, Agile Development

WORK EXPERIENCE

Junior Full-Stack Developer | Lele Ventures Pvt. Ltd. — Lalitpur, Nepal

April 2026 – Present

- Develop and maintain full-stack web applications using Laravel and React, delivering responsive, production-ready features.
- Collaborate with cross-functional teams to gather requirements, design database schemas, and implement RESTful APIs.
- Manage MySQL databases including schema design, migrations, and query optimization for efficient data handling.
- Apply Agile development practices to deliver incremental features, participate in code reviews, and ensure code quality.

Associate Software Engineer | WebLight IT Solutions — Bangalore, India (Remote)

November 2025 – March 2026

- Led frontend and backend development tasks using Laravel, Blade, Eloquent ORM, and MySQL as primary technologies.
- Integrated third-party RESTful APIs and built internal API endpoints to support dynamic web application functionality.
- Mentored junior interns and contributed to code reviews, debugging, and deployment workflows.

Software Engineer Intern | WebLight IT Solutions — Bangalore, India (Remote)

August 2025 – November 2025

- Built dynamic web applications using Laravel MVC, Blade templates, and Eloquent ORM with MySQL as the primary database.
- Designed responsive, cross-device UI components using HTML5, CSS3, Bootstrap, and JavaScript.

- Wrote and optimized MySQL queries for data retrieval, updates, and relational schema management.
- Participated in debugging, testing, and deployment workflows to maintain stable production releases.

Frontend Developer Intern | WebLight IT Solutions — Nepal

November 2024 – August 2025

- Developed responsive web interfaces using HTML5, CSS3, JavaScript, and Bootstrap across multiple client projects.
- Collaborated with backend developers to integrate APIs and ensure seamless frontend-backend data flow.
- Improved UI responsiveness and frontend performance contributing to smoother cross-device user experiences.

PROJECTS

Web-Based Task Management System — *Laravel, MySQL, JavaScript, Bootstrap*

- Built a full-stack task management app using Laravel MVC with user authentication, role-based access control, and CRUD operations.
- Designed a normalized MySQL database schema with migrations and Eloquent relationships for tasks, users, and categories.
- Implemented real-time progress tracking and responsive UI using Blade templates, Bootstrap, and JavaScript.

Restopialot – Restaurant Management System — *PHP, Laravel, Bootstrap, MySQL*

- Developed a full-featured restaurant management system to automate order processing, billing, kitchen workflow, and inventory management using Laravel and MySQL.
- Designed and implemented a role-based access control system for Admin, Manager, Cashier, and Kitchen Staff with dynamic permissions and secure authentication.
- Built responsive and user-friendly dashboards using Bootstrap, HTML, and CSS, integrated with Laravel controllers and Blade templates for smooth data handling.
- Implemented structured database design using Eloquent ORM with migrations, seeders, and relationships to ensure data integrity and scalability.
- Developed modules for menu management, order tracking, billing, and sales reporting to improve operational efficiency in restaurant workflows.

EDUCATION

Bachelor of Information Technology (BIT)

Institute of Science and Technology (IOST), Tribhuvan University — Completed 2026

CERTIFICATIONS

Generative AI for Educators — Certificate of Completion

ADDITIONAL INFORMATION

- Passionate about Laravel backend development, React and Angular frontend frameworks, and building scalable full-stack solutions.
- Quick learner and continuously expanding skills across modern web technologies including React and Angular.
- Active GitHub contributor; personal portfolio showcases live projects and development capabilities.
- Open to onsite and collaborative team environments with designers and senior developers.
